CONTROL CONCEPTS AQUIRES the assets of CONTROL MAINTENANCE aka MULTITRONICS

Orange County, CA – September 12, 2019 - Control Concepts announced that it has acquired the assets of Control Maintenance and Repair (CMR), aka Multitronics. This purchase doubles the field service capability of Control Concepts.

The assets purchase fits perfectly into Control Concepts' strategy to service both the Industrial and HVAC variable frequency drives, industrial PLCs (Programmable Logic Controllers), and associated control markets as the complexity of automation increases. CCI expands the important capability of PLC software and industrial networking services with this acquisition.

About Control Concepts: Control Concepts (CCI) is a sales, field service, and system integration company that provides solutions for industrial control products and systems.

Control Concepts in Southern California was opened in 1988 and has built a solid reputation for being a "go to" company for service and upgrades on Motor Control Systems, PLCs, and Servo Systems.   CCI is also a distributor for major lines of electric motor controls, electric motors, and gearboxes.

Control Concepts provides system debugging, repair, installation and commissioning services. The objective is to get customers up and running fast, solve problems, and prevent future production down time. CCI has worked on thousands of production lines for almost all types of manufacturing. Control Maintenance and Repair mirrors these capabilities and with the acquisition CCI

has doubled the service capacity and the ability to solve the most difficult situations, quickly.

It should also be noted, that between the two companies, there are decades of application experience. All Technicians and Engineers are at a "Senior Level" and the depth of knowledge that the enhanced capability allows CCI to take on larger projects and offer more effective 24 hour, on site, fast reaction service to the industrial community.
